# MAKE A CROC

by MARGAUX CARPENTIER
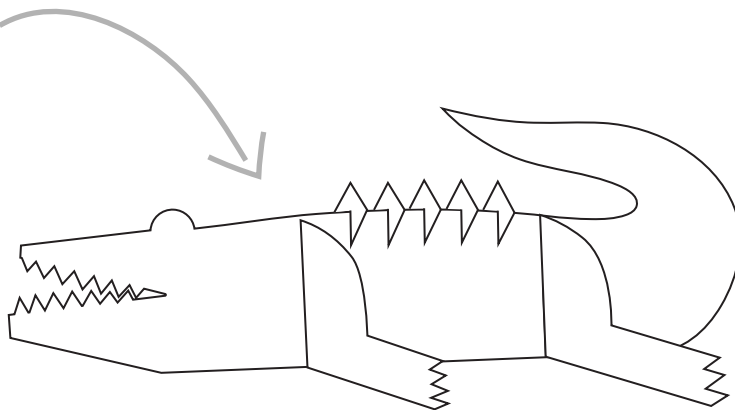

MAKE A CROC

Step by step

1 / Print out this sheet on your home printer

2 / Find a piece of card of roughly the same size (cereal boxes are ideal!)

3 / Glue the print out to your piece of card making sure the whole surface is covered with glue to avoid the paper to peel off later

4 / Cut on the dotted lines, including the slits. If you are not and adult ASK A GROWN-UP TO HELP YOU! (if the teeth are too tricky to cut out, just leave them out and create a friendly toothless croc)

5 / Get your colours out (paint, pens or pencils) and decorate both side of each shape. Feel free to use fun patterns and loads of colours!

6 / Referring to the numbers on the template fit each shape together. Like this

7/ Your croc is ready! Share pics of your masterpiece with us on instagram and don't forget to tag **@nowgalleryse10** & **@margauxcarpe**
